### 16. Additional reporting requirements:

Reports and other information	Due dates
To prepare for the annual procurement of	15 May 2018
vaccines, Country shall submit the following	
information in May each year: number of children	
to be vaccinated, vaccine stock levels including	
buffer stock, wastage rates, any proposed	
changes in presentation or minimum co-financing	
levels and vaccines received.	
In accordance with applicable Gavi processes,	To be agreed with Secretariat
Country shall report on programmatic and	
financial performance.	

#### 17. Financial clarifications: not applicable.

### 18. Other conditions:

Due to unprecedented demand for IPV and the challenges to scale up production capacities, the global IPV supply remains constrained and is unlikely to meet all country requirements in the short term. As a consequence, the actual presentation and number of doses shipped may differ from those specified in this Decision Letter. In order to mitigate these circumstances, you are strongly encouraged to optimally manage available supply and follow recommendations and guidelines from WHO and UNICEF to reduce vaccine wastage.

If Korea DPR envisages a switch in product presentation, it is encouraged to incorporate elements for both IPV presentations in your initial introduction preparations, in order to minimise the need for later interventions and facilitate the switch. In those circumstances, in principle, no product switch grant will be provided to Korea DPR.
