5 YEARS
OF SAVING LIVES &
PROTECTING HEALTH

Gavi
The Vaccine Alliance

DELIVERING ON
OUR PROMISE
2011-2015

WHAT WE PROMISED
AT OUR LONDON PLEDGING CONFERENCE

Saving
children's
lives

GAVI Alliance
Pledging
conference for
immunisation

LONDON
13 JUNE 2011

OUR ASK **US$ 3.7 billion**
OUR GOAL **Immunise 243 million children and save 3.9 million lives**

Our promise

1 Introduce **pneumococcal**, **rotavirus** and **pentavalent** vaccines in developing countries

2 **Protect the world's poorest** from other vaccine-preventable diseases

3 Make immunisation programmes **more sustainable**

→ Wider donor support

→ Increased country co-financing

→ More affordable vaccines

THREE VACCINES

Pneumococcal
Rotavirus
Pentavalent

} Together provide protection against the world's leading child killers – **pneumonia**, **diarrhoea** and **meningitis**

PLEDGED **US$ 4.3 billion**
OUR IMPACT **277 million children immunised**
More than 4 million* future lives saved

Above and beyond our promise

1 Exceeded targets for **pneumococcal**, **rotavirus** and **pentavalent** vaccine introductions

2 More than 200 vaccine introductions in Gavi-supported countries

3 Made immunisation programmes more sustainable

→ Expanded contributions from broader donor base

→ 20 vaccine programmes introduced with Gavi support now fully self-financed by countries

→ 47% more co-financing than expected

→ 43% reduction in average price of pneumococcal, pentavalent and rotavirus vaccines

Giving vaccinations is very rewarding. I know the vaccine will prevent pain or even death in the future. We can only ask those supporting us to continue to help.

Emmanuel Dominic Laku, medical officer,
Walag'lang primary health care clinic, South Sudan

*Gavi projection, 2016

TOGETHER

48x RETURN ON INVESTMENT

2016 study* reveals investing in immunisation in Gavi-supported countries can yield 48-fold return in long-term economic and social benefits

The Gavi funding model came into its own in the 2011-2015 period. All partners played their part.

DONORS: US$ 7 BILLION IN TOTAL FUNDING

→ Increased number of donors delivered on all pledges by the end of 2015 through direct contributions, **Innovative Finance Facility for Immunisation** (IFFlm) and the **Advance Market Commitment**

→ Doubling of private sector contributions, including in-kind support and donations through foundations, private companies and the **Gavi Matching Fund**

COUNTRIES: 47% MORE CO-FINANCING THAN EXPECTED

→ 14 countries self-financing 20 vaccine programmes previously supported by Gavi

→ **Bhutan**, **Honduras**, **Mongolia** and **Sri Lanka** successfully transitioned out of Gavi's financial support

MANUFACTURERS: US$ 1.3 BILLION IN COST SAVINGS

→ **Healthier vaccine markets:** more secure supply, greater proportion of manufacturers in emerging markets and more affordable vaccine prices
2001: 5 manufacturers in 5 countries
2015: 16 manufacturers in 11 countries

*Return on investment from childhood immunization in low – and middle-income countries, 2011-20, *Health Affairs*, February 2016

MORE THAN 200
VACCINE INTRODUCTIONS
in FIVE YEARS

AS MANY FUTURE LIVES SAVED
AS IN THE PREVIOUS TEN YEARS

2015
81%

2010
78%

INCREASE IN BASIC
IMMUNISATION
COVERAGE IN GAVI
COUNTRIES

ROTAVIRUS
vaccine introduced in 33
countries in 2011–2015

Now in more than half of all
Gavi-supported countries

PENTAVALENT
vaccine: completed
introductions in all 73
Gavi-supported countries

44% reduction in weighted
average price

PNEUMOCOCCAL
vaccine introduced in 51
countries in 2011–2015

Thanks to the AMC, the vaccine reached
developing countries less than 12 months
after being introduced in rich countries

FROM **6** VACCINES IN 2011 | TO **12** VACCINES IN 2015

→ Our vaccine portfolio has **doubled since 2011**

→ Gavi now supports **10** of the **11** vaccines recommended by **WHO** for all children

Introducing new vaccines into routine immunisation systems helps countries build the capacity to deliver other life-saving vaccines and respond to disease outbreaks.

◊ **Yellow fever vaccine**

Global stockpile and preventive mass campaigns

◊ **Inactivated polio vaccine**

Most extensive roll-out in the history of vaccination despite supply shortages

◊ **Multivalent meningitis vaccine stockpile**

1st line of defence against outbreaks

◊ **Japanese encephalitis vaccine**

Reducing regional disease burden

◊ **Meningitis A vaccine**

Protecting 235 million people in 16 countries

◊ **Ebola vaccine**

Funding incentive for stockpile of new vaccine

◊ **Oral cholera vaccine stockpile**

Mitigating global supply shortage; learning agenda for routine use

◊ **Measles and measles-rubella vaccines**

40 routine introductions and campaigns

◊ **HPV vaccine**

1 million girls immunised against cervical cancer in over 20 countries

OUR WORK IS FAR FROM OVER

19 MILLION CHILDREN

ARE NOT FULLY IMMUNISED WITH BASIC VACCINES

To build on our success and reach the one in five children who miss out on a full course of basic life-saving vaccines, we are shifting our focus to improving immunisation coverage, equity and sustainability.

COVERAGE

While immunisation coverage has reached a record high, too many children still don't have access to vaccines. Innovative approaches, robust data and strong health systems are essential to ensure all children are immunised.

EQUITY

Children missing out on life-saving vaccines often live in the most remote areas or the poorest communities. Going forward, our task is to work closely with countries to create strong and efficient immunisation delivery systems that reach every child, regardless of geography, wealth or gender.

SUSTAINABILITY

Long-term success relies on ensuring immunisation programmes are sustainable after Gavi's financial support stops. To do so, we will help countries secure strong political commitment to immunisation, access to affordable vaccines and efficient financial management.

2020 VISION
Our commitment for the next 5 years

⬦ Immunise **300 million** more children
⬦ Save **5-6 million** lives

In Brussels in 2014, Gavi asked for an additional US$ 7.5 billion to save 5-6 million more lives. At our 2015 pledging conference in Berlin, donors met this challenge with an historic commitment to our 2020 vision.

→ Finish the job of introducing pneumococcal and rotavirus vaccines

→ 20+ Gavi-supported countries to fully fund their immunisation programmes

→ US$ 80–100 billion in economic benefits in Gavi-supported countries

→ Healthy vaccine markets with manufacturers supplying vaccines at affordable prices

> *My grandchild is lucky to be vaccinated. When my son was little the only vaccine available was BCG.*
>

Gavi, a 21st century development model

Gavi brings together the key stakeholders in global immunisation around a single mission, combining the technical expertise of the development community with the business know-how of the private sector.

Gavi funds immunisation programmes in developing countries where the vast majority of the world's unvaccinated children live. Every year, with your help, we immunise more than half of the world's children who receive life-saving vaccines.
