Partnerships Accountability Framework - Global and Regional Foundations

Level	Function/Intervention area	Specific output/area of work		Indicators (Criteria: Time-bound, Measurable & Scope)		Sub-Indicator / Nested Indicator	Data Sources
Global/ Regional	**1. Normative Guidance and Public Health Goods**	1.1 Development of policies and operational guidance needed by countries to adopt global immunisation strategies e.g. SAGE recommendations, regulatory guidance.	1.1.1	> Percentage of normative and operational guidance documents for which technical resources were developed for adaptation and implementation at regional and country levels			To be reported by Alliance Partners
		1.2 Availability of, access to, and uptake of regional/country adapted normative and operational guidance necessary for effective programmes	1.2.1	> Number of countries supported in adapting, updating, implementing global guidance and immunisation tools (e.g., EVM, Thrive 360, EPI Review) per year.			To be reported by Alliance Partners
Global/ Regional	**2. Partnership, advocacy, strategy, governance**	2.1 Escalation of risks and issue resolution for Gavi 6.0 priorities	2.1.1	> Percentage of countries supported to monitor and identify risks to Gavi 6.0 immunisation priorities	2.1.1.a	> Percentage of country-level risks escalated to partner-led regional groups with active mitigation plans	To be reported by Alliance Partners
		2.2 Coordinated efforts, including key stakeholder engagement, at global-regional-country level as per Gavi 6.0 goals and IA2030 immunisation agenda	2.2.1	> Number of Gavi-elgible countries where partners provide global/regional technical and strategic advocacy support related to Gavi 6.0 priorities			To be reported by Alliance Partners
			2.2.2	> Number of outbreak-related global/regional coordination mechanisms that are activated annually by [WHO grade] per [vaccine-preventable disease]	2.2.2.a	> Percentage of outbreak-related coordination mechanisms with outbreak-specific action plans developed on time.	To be reported by Alliance Partners
			2.2.3	> Number of immunisation-relevant global/regional coordination mechanisms (including Gavi Alliance and governance mechanisms) where the partner contributes through a defined advisory, lead, co-lead or participatory role annually			To be reported by Alliance Partners
		2.3 Engagement on development of Gavi Alliance strategy, policies, and guidelines, and engagement with Gavi Alliance governance mechanisms	N/A	*Measurement for this area of work will be done through indicator 2.2.3 in the "Partnership, advocacy, strategy, governance" section of the Framework*			To be reported by Alliance Partners
		2.4 Provide support for country ownership and transition planning through global/regional technical expertise	2.4.1	> Percentage of countries with expected advocacy and immunisation financing technical assistance outputs, aligned with sustainable immunisation financing outcomes, completed on time			To be reported by Alliance Partners
		2.5 Foster participation and meaningful engagement of civil society partners in addressing immunisation barriers through regional and global platforms	2.5.1	> Number of global or regional advocacy mechanisms, platforms, forums, or advocacy initiatives where civil society partners are included by [partner] as stakeholders with a defined role to contribute to immunisaton and vaccinaction discussions.			To be reported by Alliance Partners

Level	Function/Intervention area	Specific output/area of work		Indicators (Criteria: Time-bound, Measurable & Scope)		Sub-Indicator / Nested Indicator	Data Sources
Global/ Regional	3. Immunisation Programme Monitoring and Data	3.1 Regular review of programme implementation to identify and support removal of barriers and address risks	3.1.1	> Number of Gavi-eligible countries supported to complete Situation Analysis, EVM Improvement Plans and/or EPI review to identify and assess risks per year			To be reported by Alliance Partners
		3.2 Facilitation of quality, timely, complete and validated submissions of country data to global/regional immunisation information systems (e.g. WUENIC, EVM, eJRF, Thrive360, etc)	3.2.1	> Number of global/regional data analytical products produced and disseminated to countries to develop and update their digital health and data systems e.g. dash boards, forcasting tools			To be reported by Alliance Partners
			3.2.2	> Percentage of Gavi-eligible countries that receive partner support to complete quality inputs to immunisation data systems (for example, eLMIS, HMIS, CCE inventory, Thrive360, eJRF) annually	3.2.2.a	> Percentage of regions meeting or exceeding Gavi and partner-agreed targets for stockout notification and escalation	To be reported by Alliance Partners
			3.2.3	> Percentage of Gavi-eligible countries receiving global/regional partner support to strengthen and improve quality of national and subnational data to determine the distribution of underimmunisation and missed communities			To be reported by Alliance Partners
		3.3 Identification, documentation, and dissemination of best practices, innovations and learnings across regions and countries	N/A	*Measurement for this area of work will be done through indicators 1.1.1 and 1.2.1 in the "Normative Guidance and Public Health goods" section of the Framework*			To be reported by Alliance Partners
		3.4 Regional/global technical assistance provided to support the use of data evidence in planning and performance management at country level	3.4.1	> Percentage of Gavi-eligible countries that received [partner] support to develop their National Immunisation Strategy (NIS) and/or Gavi holistic applications to address VPOP; Cov&Equity; Gender; BeSD; EVM; NITAG Recs; Vaccine and Cold Chain cIP [tick all that apply]			To be reported by Alliance Partners
			3.4.2	> Number of Gavi-eligible countries supported in generating and/or analyzing financial evidence to inform sustainability decisions such as updates to NIS, VPOP, NVI, domestic budgets, or preparations for transition in Gavi eligibility status and/or changes in delivery models			To be reported by Alliance Partners
			3.4.3	> Percentage of Gavi-eligible countries receiving global/regional partner support to enable national and subnational monitoring and performance evaluation to inform planning, review, and application activities (e.g. NIS, EPI reviews, Gavi grant applications)			To be reported by Alliance Partners

Level	Function/Intervention area	Specific output/area of work		Indicators (Criteria: Time-bound, Measurable & Scope)		Sub-Indicator / Nested Indicator	Data Sources
Global/ Regional	**4. Global/regional coordination, technical support and quality assurance**	4.1 Well-functioning Regional Working Groups ensure use of programme monitoring to guide technical support and course correction	4.1.1	> Number of immunisation regional working groups (RWG) that are functional (meet per schedule, have ToR, workplan and appropriate representation) by [Gavi programmatic area] per year	4.1.1a	> Percentage of Regional Working Groups (RWGs) workplan activities completed within the agreed timeline during the reporting period	To be reported by Alliance Partners
		4.2 Coordinated, effective technical assistance, quality assurance and performance management	4.2.1	> Number of regulatory quality checks conducted annually on vaccine products classified per manufacturing site			To be reported by Alliance Partners
			4.2.2	> Number of National Regulatory Authorities (NRA) or NITAGs in Gavi-eligible countries that have maintained or progressed to meet WHO-defined functional and/or maturity criteria			To be reported by Alliance Partners
			4.2.3	>Percentage of Gavi-eligible countries where vaccine safety data is shared annually between the NRA, National Immunisation programme and regional coordinating partner			To be reported by Alliance Partners
			4.2.4	> Number of outbreak vaccine response requests and/or applications received by cross-partner global and/or regional outbreak response mechanism [per Gavi supported outbreak vaccine] that are considered complete	4.2.4a	> Percentage of outbreak vaccination response activities launched on time following complete submitted applications to relevant global/regional outbreak response mechanisms	To be reported by Alliance Partners
			4.2.5	> Percentage of country technical assistance (TA) requests [per Gavi programmatic area] fulfilled by global and regional teams within agreed time frame			To be reported by Alliance Partners
			4.2.6	> Percentage of Gavi-eligible countries receiving global/regional partner support to strengthen delivery of immunisation services integrated with primary health care			To be reported by Alliance Partners

Gavi Programmatic Areas

1 Service Delivery & Demand Generation
2 Human Resources for Health
3 Supply Chain
4 Data & Digital Systems
5 Governance, Leadership & Management
6 Health Financing
7 Campaigns
8 Outbreaks, Epidemics & Pandemics
9 Diagnostics
