More than 1 million doses of Gavi-funded cholera vaccines heading to Sierra Leone after severe flooding and landslides

Board meeting 29-30 November 2017

Last year's top risk exposure 2016 residual risk exposure, taking into account existing mitigation

the potential consequences once the risk materialises

Programmatic risk

🔵 Corporate risk

Very high risks

- a) Country management capacity
- b) Data quality
- c) Transition readiness
- d) Country performance post-transition

High risks

- e) Outbreaks disrupt immunisation
- f) Vaccine confidence
- g) Misuse by countries
- h) Donor support
- Partner capacity
- j) Strategic relevance
- k) Supply shortages
-) Frequent or unplanned campaigns
- m) HSIS value for money
- n) Secretariat disruption
- o) Forecasting variability

Medium risks

- p) Unresolved co-financing default
- q) Ability to influence C&E drivers
- r) External programme disruption
- s) Closed vial wastage
-) Expanding partnership complexity
- u) Cyber attack
-) Leadership succession
- w) Board confidence
- x) Secretariat capacity
- y) Misuse by partner
- z) Market distortion
- aa) Board conflict
- bb) Misuse by Secretariat
- cc) Changing Board priorities
- dd) Donor grant fulfilment

impact

impact

Top risk evolution since last year 2017 residual risk exposure, taking into account existing mitigation

Actual exposures versus risk appetite Willingness to accept the current top risk exposures

Recommendation

The Gavi Alliance Audit and Finance Committee recommends to the Gavi Alliance Board that it:

• Approve the 2017 Risk & Assurance Report attached as Annex A to Doc 06

The Gavi Alliance Board is furthermore requested to **provide guidance** on the following questions:

- a) Does the Board agree with the top risks identified this year and its ranking against likelihood and impact?
- b) Are there concerns on risk exposures clearly outside Gavi's risk appetite (particularly a) Country management capacity, b) Data quality, and c) Ability to reach under-immunised) and – if so, are further investments or different approaches to mitigation required?
- c) Do any of these risks require a more in-depth discussion by the Board at a future date?

THANK YOU
