Gavi 6.0 recalibration

Lever 2: The PAF is a tool to drive mutual accountability between countries, partners and Gavi

The Partnerships Accountability Framework (PAF) is part of the Gavi 6.0 Execution Framework

Core function:
Immunisation
Programme Support

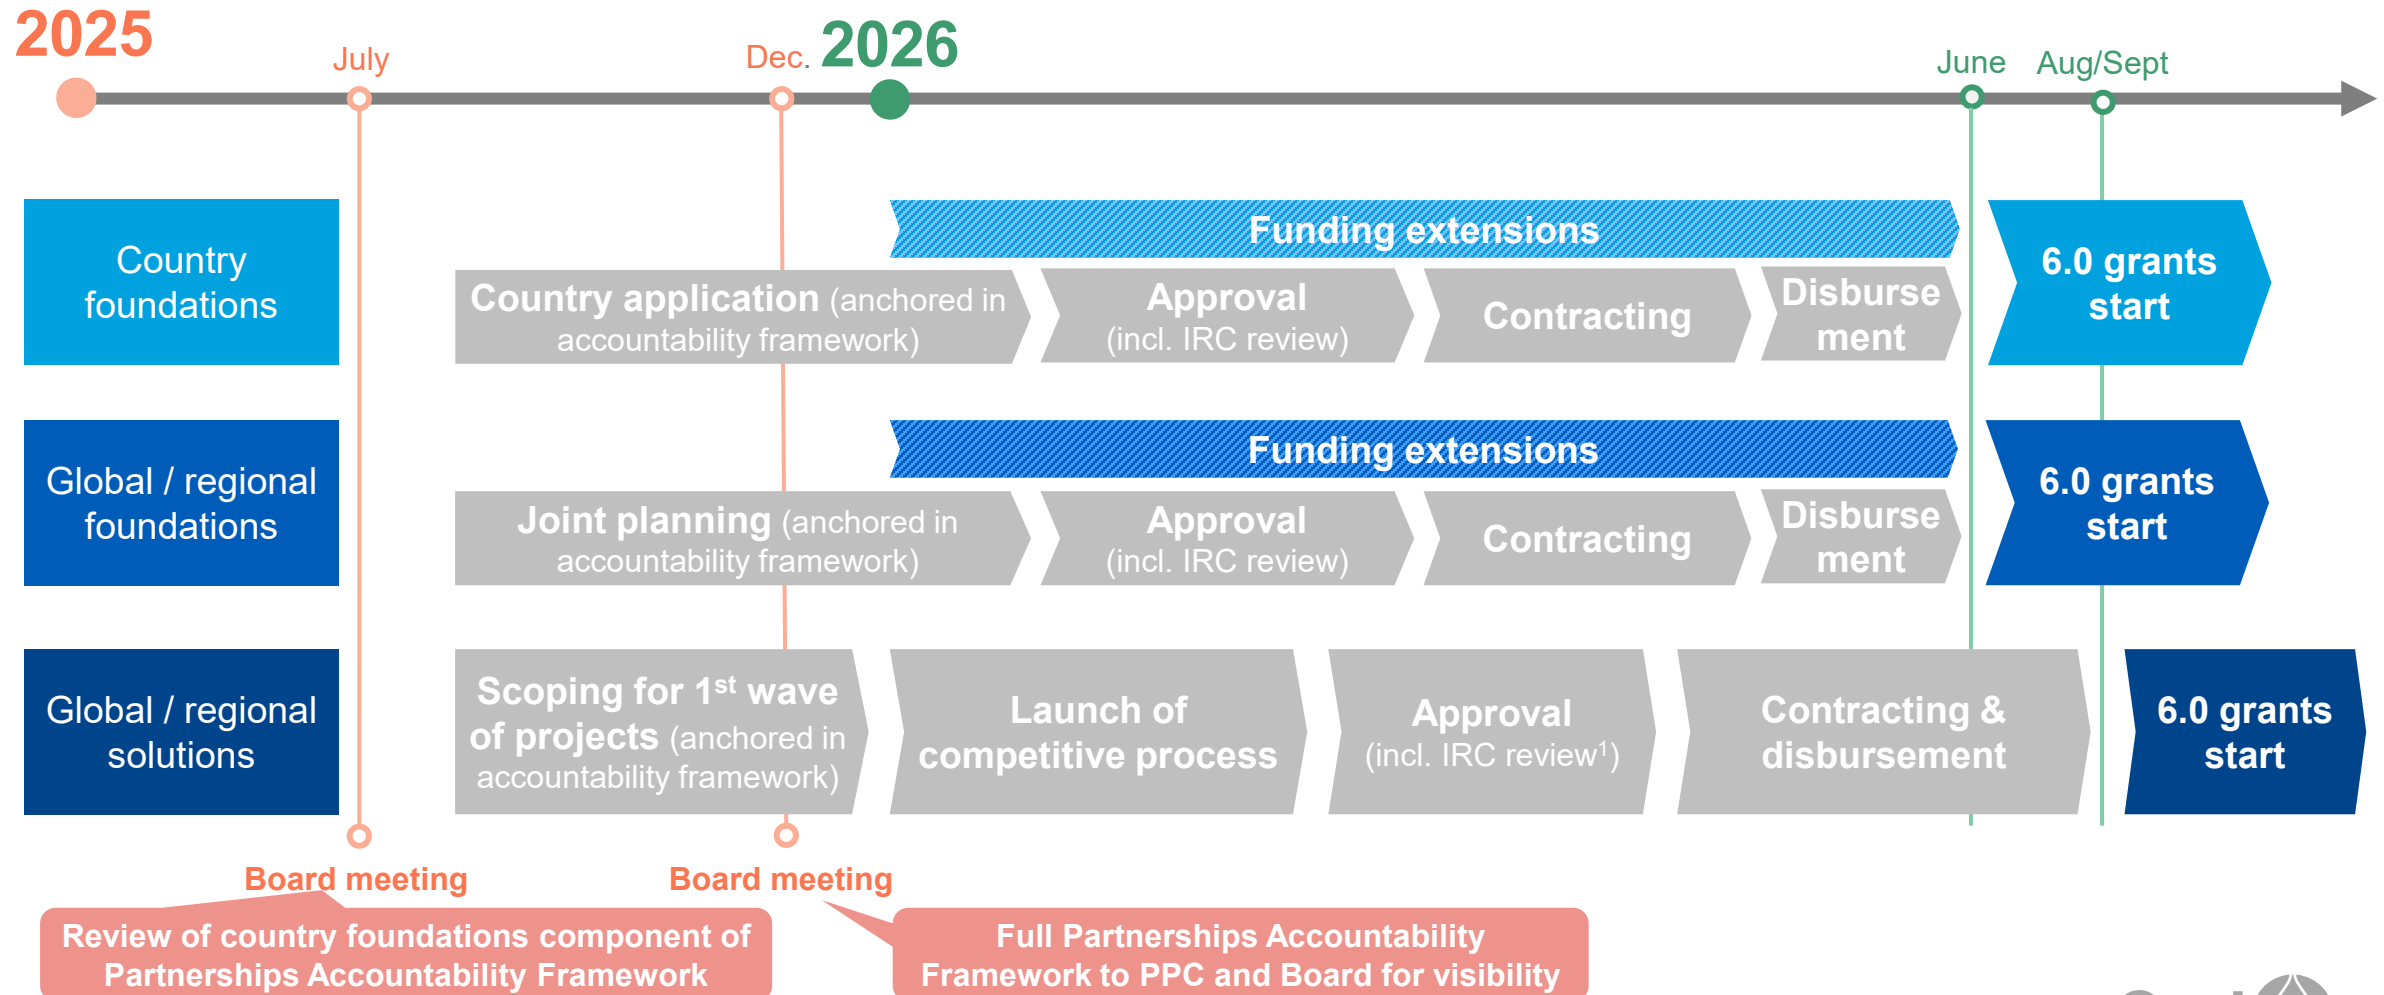

Menu of country functions:

- Vaccine and cold chain management
- Data
- Demand
- Emergency/Outbreak preparedness and response

Results-driven, biannual reporting and rigorous performance management

Phased approach to roll-out of new funding model minimises bridge funding

Decision 15: Evolution of Gavi's Partnership Approach

The Gavi Alliance Board:

- a) **Approved** the evolution of the Partnership Approach described in Annex D to Doc 11, as amended by the Board in its Gavi 6.0 recalibration, including a US\$ 100 million reduction of the Foundational Fund to be applied proportionately across the three guardrails: a) Country Foundations [to US\$ 154 million], b) Global and Regional Foundations [to US\$ 159 million] and c) Global and Regional Solutions [to US\$ 80 million].
- b) **Approved** the country foundational functions component of the Partnerships Accountability Framework (PAF) described in Annex C to Doc 11.
