3. Review of FCE draft report

What are the Board priorities for evaluation?

Given the MTR, Gavi 5.0 and increasing collaboration with the GF and other global health partners:

What are the priority issues the Board would like the EAC to consider over the next few years?

What are the new areas for an evaluation focus?

What areas with an existing evaluation focus need more work?

These might include:

1. **Fund flows and health systems support**
2. **Fragile states**
3. **Technical support**
4. **Countries in transition; middle income countries**

Thank you
