

EAC (Evaluation Advisory Committee) Assessment of CSO Evaluation

CSO Evaluation Proposed content:

After reviewing the final report for the 'Evaluation of Gavi's Support to CSOs', The Gavi Evaluation Advisory Committee (EAC) felt that the report fully met Gavi's quality standards.

The report reflects the assignment per the Request for Proposal (RfP). The Theory of Change developed as part of the evaluation is appropriate, and the use of this to drive the evaluation questions and approach was correct.

The methodological approach and evaluation design were technically sound and addressed the evaluation questions, whilst also highlighting the limitations. In addition, the findings were evidence-based and informed by a wide variety of data from multiple stakeholders. The recommendations follow logically from the findings and evidence cited in the report.

Overall, the lessons learned in the evaluation report are likely to contribute to general knowledge and the recommendations appear actionable for the Gavi Alliance and respective key stakeholders.
