

Country	IRMMA Framework	Location	Programmatic Area	HSS objective	Activity	Partner	Name of subcontracted local partner, if applicable	Jun-21	Nov-21	Jun-22	If applicable, enter the code to the Great Performance Framework indicator to which this activity is linked	Expected Outcome	TOTAL	
Bangladesh	Reach	National	LMC	Strengthening service delivery system for improving coverage and equity of immunization services in 16 target districts and 4 target city corporations	Technical support to map missed children and missed community in urban areas and reach zero dose/unimmunized children through development of targeted annual plan, implementation of individual tracking and integrating immunization services with PHC	UNICEF			Annual workplan and budgets include interventions to reach zero dose children			Coverage improvement plan for selected urban areas is available		
Bangladesh	Measure	National & Subnational	Supply Chain	Ensure effective vaccine and cold-chain management and uninterrupted supply of quality vaccines and injection supplies	Technical support for development of EVM-IP, cold chain rehabilitation plan, triangulating stock and performance data including supporting analysis of VM	UNICEF				[Y/N] Strategic planning documentation (EVM-IP, CIP, cold chain rehabilitation plan) supported and submitted to MoH, incorporating VM, sustainability and zero-dose considerations (as applicable)		EVM IP available		
Bangladesh	Monitor	National & Subnational	Data	Strengthen capacity of Health system of the country for implementation of VPD surveillance and real-time health management information system	Technical assistance for digital system development/enhancement, guiding rolling-out of digital platforms with enhanced interoperability and institutionalize system for monitoring & data for action with accountability systems	UNICEF				Immunisation registry (EIR, community registry etc) rolled out		e-registration rollout plan available	\$305,640.00	
Bangladesh	Advocate	National	Immunisation Financing	Strengthen leadership and management capacity of EPI office of DGHS and Planning Wing of MoHFW	Technical support to conduct public expenditure review for immunization services and develop investment case for immunization for policy advocacy on increasing public financing with fiscal space analysis for immunization	UNICEF	in partnership with ThinkWell			Immunisation investment case developed		Policy paper for policy advocacy on increasing public financing for immunization		
Bangladesh	Reach	National	LMC	Strengthening service delivery system for improving coverage and equity of immunization services in 16 target districts and 4 target city corporations	Technical support to map zero dose and underimmunized children through micro planning. Microplanning exercise is undertaken by GoB and supported by WHO technical officers in the field. Focus of this exercise will be on high priority (special) zones identified through risk assessment exercise. The network will explore use of innovative strategies like GIS to to microplan routine EPI in hard to reach areas for the subsequent microplanning exercise. Following this the WHO network along with government and partners will undertake intensive concurrent monitoring exercise to assess the reach of services in hard to reach and high risk areas through immunization session monitoring and house to house visits. The activity will generate data on drop outs and left outs, services received in males and females, caregivers response to reasons for missed doses etc. Data will lead to taking corrective actions to ensure high immunization coverage and equity.	WHO				Annual workplan and budgets include interventions to reach zero dose children			Service delivery plan to reach missed children is available	
Bangladesh	Reach	National	Service Delivery	Strengthening service delivery system for improving coverage and equity of immunization services in 16 target districts and 4 target city corporations	Assist GoB to develop long term ( approx. 5 years)costed action plan of urban immunization based on approved strategy. Assess availability of human resource and provide recommendations to GoB high level advocacy	WHO			Service delivery related barriers of missed communities to access immunisation services identified and prioritized			GoB approved costed plan		
Bangladesh	Monitor	National & Subnational	Service Delivery	Strengthening service delivery system for improving coverage and equity of immunization services in 16 target districts and 4 target city corporations	Technical support to strengthen routine EPI microplanning using data triangulation exercise ( customized to national context). Using data sets from different sources the plan is to develop two tools that will help prioritize districts / corporations /upazilas and the other will help prioritize sub upazilas / sub corporation levels (wards/zones). GIS will be used to map the areas to improve access/ equity focus in HTR areas in priority districts.	WHO				Tools and mechanisms to assess and monitor quality and acceptance of services developed and in use by countries		>95% District/City Corporation microplan updated	\$465,450.00	
Bangladesh	Advocate	National	Demand	Strengthening service delivery system for improving coverage and equity of immunization services in 16 target districts and 4 target city corporations	Strengthening routine immunization in urban and rural settings through training based on national EPI guidelines with coordination and engagement of CSO/NGOs, and conduct EPI review meeting with the participation of GoB and partners	WHO				NGO/CSO mapping developed		>90% planned review meetings conducted		
Bangladesh	Advocate	National	Human Resources for Health	Strengthening service delivery system for improving coverage and equity of immunization services in 16 target districts and 4 target city corporations	Technical support for advocacy and preparation of new vaccine introduction (Rota, HPV, JE, typhoid and others)	WHO			Workshop conducted to discuss findings of new learning and performance management approaches and workplan developed			New vaccine application documents developed		
Bangladesh	Monitor	National & Subnational	Service Delivery	Strengthen capacity of Health system of the country for implementation of VPD surveillance and real-time health management information system	Capacity building of the AEFI committees on AEFI investigation and Causality Assessment at different levels. Introduction of VAEIMS/AEFI tracking system	WHO			Tools and approaches developed to improve and sustain quality and safety of immunisation services			Online AEFI surveillance system established
