

Country	BMMA Framework	Location	Programmatic Area	HSI objective	Activity	Partner	State of substructural fund partner, if applicable	Jun 21	Nov 21	Jan 22	Applicable under the code to the Grant Performance Framework Indicator to which this activity is linked	Expected Outcome	TOTL	
The Gambia	Identify	National & Subnational	Data	To improve the high immunisation coverage of 80% and improve the quality and responsiveness to RCI Service delivery	Expansion of GIS mapping of immunisation service delivery points and development of GIS platform	UNICEF			GIS platform implemented			Real-time analysis of all immunisation service delivery points, performance and uptake data from monthly reviews to enable prioritisation of activities to improve coverage and equity. MCH facilities prepared to register and use the GIS platform		
The Gambia	Monitor	National & Subnational	Data	To enhance the capacities and early management of health workers for improved RCI Services	Support Effective Vaccine Management Assessment (EVMA) and implementation.	UNICEF			Consult identified and assessment commenced	EVMA performed		EVMA assessment conducted and recommendations implemented.	\$ 110,720	
The Gambia	Identify	National & Subnational	Service Delivery	To improve the high immunisation coverage of 80% and improve the quality and responsiveness to RCI Service delivery	Engaging of consultant to conduct an immunisation equity assessment	UNICEF				Service delivery approach suitable to reach target communities identified and endorsed		An immunisation equity assessment conducted.		
The Gambia	Identify	National & Subnational	Data	To improve the high immunisation coverage of 80% and improve the quality and responsiveness to RCI Service delivery	Support the development of Adverse Events Following Immunisation training (AEFI) manual.	WHO	AEFI platform implemented	AEFI platform implemented	AEFI country assessments conducted	Post-campaign coverage survey implemented		An initial AEFI manual developed.		
The Gambia	Reach	National & Subnational	LMC	Program management	Support the development of a national immunisation policy.	WHO	ISN programme national-level core bundles such as policy and planning, surveillance, vaccine stock management, M&E, fund management					A national immunisation policy developed.	\$ 69,010	
The Gambia	Measure	National & Subnational	Data	To maintain the high immunisation coverage of 80% and improve the quality and responsiveness to RCI Service delivery	Engaging of a consultant to support MR Post-Campaign Coverage Survey	WHO	Community based surveillance system implemented	Community based surveillance system implemented	Data improvement field activity implemented (vaccine, medicine, financing, supervision, monitoring, workshop, others)	Post-campaign coverage survey implemented		A Post-Campaign Coverage Survey conducted and a report produced.		
The Gambia	Monitor	National & Subnational	Service Delivery	To maintain the high immunisation coverage of 80% and improve the quality and responsiveness to RCI Service delivery	Engaging of consultant to support Report Card/Convenience Monitoring (RCM) implementation during the MR campaign	WHO	Service delivery related barriers of missed communities to access immunisation services identified and prioritised					RCM conducted during the campaign and findings used to guide focus areas.		
The Gambia	Reach	National & Subnational	LMC	Program management	Support routine HPV vaccination to start with 2nd cohort (girls aged 9 yrs)	FAO	Assistance for strategies to reduce HPV related	Reduce cohort (second dose delivered in schools and communities)	HPV vaccine is routinized			HPV is fully integrated in regular activities of health institutions to reduce zero dose and missed dose children		
The Gambia	Measure	National & Subnational	Data	Support for a rapid assessment for HPV and areas of low coverage	Support for a rapid assessment for HPV and areas of low coverage	FAO	Rapid assessment approaches initiated	Final report submitted				Areas of low coverage (missed dose or zero dose children) are identified		
The Gambia	Reach	National & Subnational	LMC	Program management	Support for material and communication materials, adoption of materials and strategy between sites and cluster 2 of routine cohort	FAO	Social mob and communication materials and support available	Social mob and communication materials and support available				Revised materials provided for distribution		
The Gambia	Monitor	National & Subnational	LMC	Program management	Support for developing and implementing coverage improvement plan	FAO	Improvement plan developed and implemented to reduce zero dose and missed dose children	Improvement plan developed and implemented to reduce zero dose and missed dose children	Reductions in zero dose and missed dose children are observed			Improvement plan are implemented leading to reductions in zero dose and missed dose children		
The Gambia	Monitor	National & Subnational	LMC	Program management	Support for monitoring and supervision expansion of routine HPV delivery and implementation of coverage improvement plan	FAO	Performance management support provided to reduce zero dose and missed dose children	Performance management support provided to reduce zero dose and missed dose children	Performance management support provided to reduce zero dose and missed dose children			Supervision strengthened capacity of health workers to reduce zero dose and missed dose children		
The Gambia	Reach	National & Subnational	Data	Support the DPI for capacity building for data management for HPV and routine vaccines, assess with developing a plan for electronic vaccination data	Support the DPI for capacity building for data management for HPV and routine vaccines, assess with developing a plan for electronic vaccination data	FAO	Plan for piloting electronic data into regular data system developed	Plan for piloting electronic data into regular data system developed	Plan implemented and assessed with recommendations for scale up			Improved data electronic system performed		
The Gambia	Monitor	National & Subnational	Supply Chain	Support of VVS deployment	Continue support for VVS operations capacity building of users and administrators	FAO	Agreements in place and one training completed/started	Agreements in place and one training completed/started	2nd training completed/started	2nd training completed and hardware ready for use		VVS is used for vaccine stock management and capacity to build the DPI and ICT are prepared to manage VVS	\$ 188,110	
The Gambia	Monitor	National & Subnational	Supply Chain	Support of VVS deployment	Support Lincoln server for the VVS hosting	FAO	Plan for regular data upload (i.e. weekly uploads, regular updates) including user (DPI) on data platform at end of training / monthly service	Plan for regular data upload (i.e. weekly uploads, regular updates) including user (DPI) on data platform at end of training / monthly service				regular data visualized on website		
The Gambia	Advocate	National & Subnational	LMC	To improve the high immunisation coverage of 80% and improve the quality and responsiveness to RCI Service delivery	National planning and TVIG meetings for HPV virus (male and Multi-Age Cohort)	PAHO	Funds are available substantially to execute planned activities	Funds are available substantially to execute planned activities				At least 80% of planned planning and TVIG meetings held to facilitate successful implementation of the second of the HPV vaccines		
The Gambia	Measure	National & Subnational	LMC	Program management	Participate in Gambia annual Joint Appraisal (JGA) and grant renewal processes to ensure continuity of HPV TA support	PAHO	JGA review and Joint Appraisals are well managed ensuring availability of relevant data to track progress	JGA review and Joint Appraisals are well managed ensuring availability of relevant data to track progress	JGA review and Joint Appraisals are well managed ensuring availability of relevant data to track progress	JGA review and Joint Appraisals are well managed ensuring availability of relevant data to track progress		Joint Appraisal (JGA) conducted and grant renewal processes for HPV TA support completed		
The Gambia	Monitor	National & Subnational	Service Delivery	To improve the high immunisation coverage of 80% and improve the quality and responsiveness to RCI Service delivery	National support to RCI to monitor HPV dose 2 implementation progress, identify challenges, propose solutions	PAHO	Service delivery related barriers of missed communities to access immunisation services identified and prioritised	Service delivery related barriers of missed communities to access immunisation services identified and prioritised	Service delivery related barriers of missed communities to access immunisation services identified and prioritised			At least 80% of targeted population accessed and technical support/financing implementation challenges, best practices, and the way forward presented and prioritised		
The Gambia	Measure	National & Subnational	Data	To strengthen the generation and timely use of quality data and information for decision making in RCI Services	Assess with HPV PVE and cluster survey implementation	PAHO						PVE and cluster survey conducted to provide information on the coverage of the HPV vaccine and document opportunities/best practices, challenges, and lessons learnt to inform decision making		
The Gambia		National	Financial/General Management		1. Identify key bottlenecks in implementing GMS & RCI meetings. 2. Develop action plan to support the RCI steering committee and RCI coordinator in leading bottlenecks in implementing the meeting. 3. Build capacity and understanding of RCI processes of the grant management process, including reporting and audit requirements. 4. Finalize the accounting and reporting system is appropriately configured to support grant reporting requirements. 5. Build capacity to procurement, advance and asset management in line with PCA accountability. 6. Strengthen DPI capacity in budgeting and planning and oversight.	Recepco Advisory								\$ 12,130
The Gambia		National	Data		Verify or completely transitioned to DHIS2 for DPI	UNICEF/WHO	1. DPI legacy data migrated to DHIS2 system	Transition plan for DPI in place with agreed data for end of project system	Completed on-site plan meet					
The Gambia		National	Data		WHO surveillance digital package installed	UNICEF/WHO	1. WHO surveillance digital package installed in WHO country reporting to WHO regional DHIS2 established	Core team trained on WHO surveillance digital data package and how to use it	Completed on-site plan meet					\$ 32,051
The Gambia		National	Data		COVID-19 digital package installed	UNICEF/WHO	COVID-19 digital package installed	Core team trained on COVID-19 digital data package and how to use it	Completed on-site plan meet
