Guinea-Bissau	3. Supply Chain	3.3 Increase capacity and quality of vaccine storage and distribution to improve vaccine availability, especially in the last mile	Technical support for elaboration of costed Cold Chain Equipment Optimization Platform (CCEOP) proposal to be implemented at subnational level	* Conduct desk review and literature review of data and relevant documentation including monitoring data and other relevant documentation (Set of country documents mutually agreed upon by partners and MoPH) combined with series of interviews	UNICEF	UNICEF	\$ 854,273.02
Guinea-Bissau	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	Implementation of immunization strategy for the urban areas (Capital city Bissau)	Reduction of zero dose in the capital city Bissau	UNICEF	Local	
Guinea-Bissau	3. Supply Chain	3.2 Improve stock management for vaccines and devices to avoid facility-level stock-outs	Technical support of a Cold Chain & Logistic Specialist for vaccine stock monitoring at district level; (national and sub-national level)	* CCE inventory update on regular basis; * Temperature monitoring on monthly/quarterly basis; * Strengthen EPI team capacity on Effective Vaccine Management (EVM) * EVM assessment conducted and	UNICEF	UNICEF	
Guinea-Bissau	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Five technical support of Immunization officers to strengthen the ten regional EPI team to improve the routine immunization/SIAs and data quality (at subnational level)	* At least 80% of district reach 80% of DTP3 coverage * 100% of Zero doses and underserved children identified are vaccinated * 100% of new staffs are trained on Effective Vaccine management	UNICEF	UNICEF	
Guinea-Bissau	4. Health Information Systems and Monitoring & Learning	4.2 Improve data use-related capacity, tools, evidence generation and/or systems for programme monitoring and learning, especially at the subnational level	Support data quality improvement by using digital system, and capacity building	Accurate vaccination and VPD surveillance data available on a timely basis for decision making	WHO	WHO	
Guinea-Bissau	5. Vaccine Preventable Disease Surveillance	5.3 Sustainably integrate vaccine-preventable disease surveillance, which meets immunisation programme needs, into a resilient national disease surveillance system	Support for VPD and AEFI surveillance (investigation missions, causal analysis meetings, data harmonization meetings) integration into a national surveillance system and strengthening of the VPD surveillance towards achievement of the global eradication and elimination and control agenda	Earlier detection, reporting, investigation and specimens collection of the vaccine preventable diseases, as well as AEFI cases.	WHO	WHO	
Guinea-Bissau	5. Vaccine Preventable Disease Surveillance	5.3 Sustainably integrate vaccine-preventable disease surveillance, which meets immunisation programme needs, into a resilient national disease surveillance system	Support for the development of the COVID-19 integration plan (Provide technical guidelines, collect the needed information including PNDV2, IAR report, etc.)	The proposals and plans for the integration of COVID-19 developed and validated by ICC	WHO	WHO	

Guinea-Bissau	5. Vaccine Preventable Disease Surveillance	5.2 Increase timely detection of and response to vaccine-preventable disease outbreaks	Support for laboratory capacity building processes of detection, assessment, response, notification, and monitoring of events particularly for vaccine preventable diseases	The samples of VPD are handled from the field to the national and regional reference laboratory on a timely bases, and the % of inadequate specimens reduced drastically.	WHO	WHO	
Guinea-Bissau	4. Health Information Systems and Monitoring & Learning	4.6 Other objective related to HIS and M&E	Support Microplanning of EPI and Regional Health management related activities , reporting , monitoring and evaluation at the sub-national levels	The regions are able to monitor and evassess the implementation of their plans	WHO	WHO	
Guinea-Bissau	7. Governance, Policy, Strategic Planning, and Programme Management	7.2 Strengthen programme performance monitoring and management systems at all levels	Support Planning, implementation, monitoring and evaluation of the NIS (provide the tools of the implementation of NIS, support annual cycle of planning based on the NIS at all levels)	The annual based on the NIS available every year, and all the needed tools provided at the biggining of the year	WHO	WHO	
Guinea-Bissau	7. Governance, Policy, Strategic Planning, and Programme Management	7.1 Strengthen capacity of governance/technical bodies for planning, coordination and tracking progress at all levels, particularly for reaching zero-dose children	Support the establishment of NITAG and the strengthening of the skills of its members.	NITAG put in place	WHO	WHO	
Guinea-Bissau	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Measles rubella campaign SIA including at subnational levels	Measles follow up campaigning : support for the application and microplanning	WHO	WHO	
Guinea-Bissau	5. Vaccine Preventable Disease Surveillance	5.2 Increase timely detection of and response to vaccine-preventable disease outbreaks	Support for AEFI surveillance (management of serious AEFI, investigation missions, causal analysis meetings, data harmonization meetings)	Earlier detection, reporting, investigation and specimens collection of the vaccine preventable diseases, as well as AEFI cases.	WHO	WHO	
Guinea-Bissau	5. Vaccine Preventable Disease Surveillance	5.5 Other objective related to VPD surveillance	Support for laboratory capacity building processes of detection, assessment, response, notification, and monitoring of events particularly for vaccine preventable diseases	The samples of VPD are handled from the field to the national and regional reference laboratory on a timely bases	WHO	WHO	
Guinea-Bissau	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Technical support for the introduction of the new vaccines (MenA, MCV2,HPV and Malaria Vaccine, Adaptation of guidelines, tools and training materials as well as support for the collection, analysis and transmission of the district immunization data), and monitoring of AEFI during and after the introduction also at subnational level	The Men A and MV2 introduced and the proposals and plans for the introduction of HPV and Malaria vaccines submitted and accepted	WHO	WHO	
Guinea-Bissau	4. Health Information Systems and Monitoring & Learning	4.2 Improve data use-related capacity, tools, evidence generation and/or systems for programme monitoring and learning, especially at the subnational level	Support data quality improvement by using digital system and capacity building	Accurate vaccination and VPD surveillance data available on a timely basis for decision making	WHO	WHO	
Guinea-Bissau	8. Health Financing	8.2 Support the budgeting and targeting of domestic resources for immunisation and/or primary healthcare based on equity considerations	Support advocacy efforts for sufficient budget to fund vaccine procurement needs through development of key advocacy materials / messages. Support the development of a health efficiency spending study for Guinea Bissau Coordination with key development partners in Health but also working with Ministry of Finance including World Bank and IMF.	Financial and programmatic sustainability of the EPI programme and engagement of the Government	World Bank	World Bank	\$ 135,000.00
Guinea-Bissau	8. Health Financing	8.1 Support planning of Gavi and non-Gavi-supported vaccine procurement costs based on quality vaccine forecasts as part of national and subnational health budgets	Review, and as appropriate, support revision of the forecast and consequent funding needs for the 2023-2027 procurement of vaccines and other vaccine-related commodities (including the Gavi co-financing obligations), including identification of the existing and possible sources of funding and the budget funding gap; Train the implicated health personnel on vaccine forecasting and budgeting; Map the Vaccine Procurement Budgeting Process to	Timely procurement of vaccines via payment of the country's contributions	World Bank	World Bank
