Pakistan	7. Governance, Policy, Strategic Planning, and Programme Management		Programme management: Increase programme management performance through data and routines with senior leadership in each province. Focused on federal and provincial levels to strengthen supervision, governance and accountability, through regular NICC meetings, regular supervision, developing performance framework and implementation of PEI/EPI synergy framework.		ACASUS	ACASUS	\$ 338,750.00
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	1. Strengthening of village/ slum immunization committees comprising local influential in selected UCs of Bannu, Laki Marwat and Peshawar;	1. Demand generation in selected areas/ UCs of Bannu, Laki Marwat and Peshawar are sustained through building partnerships with the communities.	CHIP	CHIP	\$ 149,774.00
Pakistan	6. Demand Generation and Community Engagement	6.3 Improve capacity in designing, implementing, monitoring and/or evaluating demand generation activities at all levels	2. Endorsement of the manual and its tool kits designed for implementation, monitoring and evaluation of DG methodologies at province level;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.6 Other Demand Generation and Community Engagement objective	3. Awareness sessions at communal places like Hujras, Mosques and other communal places in Bannu, Lakki Marwat and Peshawar;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	3. Community resource persons already in place are provided refresher with a view to continue providing support in social mobilization and demand generation activities.		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.3 Improve capacity in designing, implementing, monitoring and/or evaluating demand generation activities at all levels	1. Capacity building of DoH in Peshawar, Lakki Marwat and Bannu on the endorsed manual;	1. DoH in Laki Marwat, Bannu and Peshawar have improved knowledge and capacities to design, monitor and evaluate the DG immunization programmes.	CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	2. Training and capacity building of CRPs and Health Workers in micro census for the identification and demarcation of zero dose and defaulter children along with marking of gender on the doors of the houses where children are residing;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	3. Training and capacity building of CRPs on the guidelines;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	3. Training of CRPs and health staff on monitoring and supportive supervision.		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.6 Other Demand Generation and Community Engagement objective	4. Organizing World Immunization Weeks and Mothers Days in Bannu, Lakki Marwat and Peshawar		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.6 Other Demand Generation and Community Engagement objective	6. Interview of DoH towards the importance of immunization at local radio channels.		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.6 Other Demand Generation and Community Engagement objective	1. Healthy baby shows for encouragement of mothers ensuring complete children vaccination;	1. Communal determinants to improve immunization through social mobilization for the reduction of zero dose and defaulter documented and used in Bannu, Laki Marwat and Peshawar.	CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	2. Capacity building of CRPs on immunization, social mobilization and data management for the demand generation and immunization;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	3. Training and capacity building of immunization staff in Bannu, Lakki Marwat and Peshawar on Interpersonal communication skills and social mobilization for immunization.		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	2. Institutional strengthening of PCCHI i.e. registration & statutory requirements etc.		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.4 Increase advocacy for social and political commitment as well as increased accountability for equitable immunisation at all levels	1. District Review workshops on quarterly basis in Bannu, Lakki Marwat and Peshawar by engaging DoH, DC Office, DPCR, Local Body Representatives, Social Welfare and TMA Offices for sharing of challenges and their solution.	1. Equitable immunization agenda for the children is disseminated across the districts in Bannu, Laki Marwat and Peshawar.	CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.6 Other Demand Generation and Community Engagement objective	5. Broadcasting of public service messages on electronic/social media;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	1. Consultation with stakeholders at District and UC levels for the development of human centric Social Mobilization (SM) strategies to increase demand for immunization in KPK central and southern districts;	1. Context specific provincial level guidelines and human centric models for improved immunization programmes through demand generation are developed and shared. 2. Improvement in vaccination coverage by reducing zero dose and continuation of vaccination of the defaulters is ensured in Peshawar, Bannu and Lakki Marwat.	CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	1. Desinging of manual on micro census;	1. Systematic target setting is learnt and piloted in Bannu, Laki Marwat and Peshawar for the coverage of zero dose and defaulter children particularly girl children.	CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	1. Development of guidelines for the Social Mobilization and Demand Generation for improved immunization and reduced zero dose and defaulters;	1. Vaccination is endorsed as a development agenda in Bannu, Laki Marwat and Peshawar by line departments; 2. Public private partnership model to reduce zero dose and defaulters particularly the girl child in rural districts of Bannu, Laki Marwat and Urban Slums of Peshawar is piloted.	CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	2. Formation of district immunization forums and its interaction with local bodies in District Bannu, Lakki Marwat and Peshawar.		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	4. Vaccination of zero dose and defaulters residing in rural districts and urban slums of three districts		CHIP	CHIP	

Pakistan	6. Demand Generation and Community Engagement	6.3 Improve capacity in designing, implementing, monitoring and/or evaluating demand generation activities at all levels	1. Development of standardized manual comprising designing, implementation, monitoring and evaluation methodologies of demand generation activities for immunization at KP province level;	1. Province endorsed and customized methodologies for designing, monitoring and evaluating the SM programmes ensured;	CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	4. Micro Census in three districts to enlist zero dose and defaulters, particularly girls		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.3 Improve capacity in designing, implementing, monitoring and/or evaluating demand generation activities at all levels	1. Capacity building of the CSOs members of PPCHI on Proposal writing and designing of immunization demand generation models with human centric approaches;	1. 03 maturity indicators of PCCHI are improved to work as an independent body for the implementation of human centric demand generation immunization programmes.	CHIP	1. CHIP and 4 PCCHI Members in 04 provincial bodies; 2. PCCHI as an institution.	
Pakistan	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	2. Demand generation model programs using human centric approaches with a view to develop 04 programs in the provincial contexts for documentation of context oriented SM and demand generation strategies by 04 CSO members of PCCHI;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.6 Other Demand Generation and Community Engagement objective	2. Door to door visits for individual counseling of mothers having children ageing less than 23 months;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	4. Implementation of social mobilization and demand generation guidelines for the reduction of zero dose and defaulter particularly for girls residing in rural areas of Bannu and Lakki Marwat along with communities residing in urban slums of Peshawar;		CHIP	CHIP	
Pakistan	6. Demand Generation and Community Engagement	6.5 Strengthen partnerships with local and community actors to improve demand for immunisation	5. Engagement and mobilization of private hospitals/ maternity homes for the establishment of satellite vaccination sites in Peshawar, Bannu and Laki Marwat;		CHIP	CHIP	
Pakistan	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Technical Assistance for rolling-out SMS and location-based messages for under-immunized children and defaulters, with a focus on children who have not received penta-1 vaccine (zero dose) and missed communities (Sindh, KPK, ICT, GB)	Increase in zero dose coverage rates, catch-up of defaulters, reaching missed communities	IRD Global	IRD Global	\$ 878,933.00
Pakistan	4. Health Information Systems and Monitoring & Learning	4.4 Strengthen country capacity to detect, evaluate and respond to serious adverse events following immunisation	Technical Assistance for rolling-out AEFI module in ZM-EIR	Improved data monitoring for AEFIs, including reason, location and individual child details	IRD Global	IRD Global	
Pakistan	4. Health Information Systems and Monitoring & Learning	4.3 Strengthen information systems relevant for the identification and reach of zero-dose and under-immunised children	Technical support to register zero dose children in ZM-EIR through uploading of EOC zero dose lists	Improved coverage of zero dose children	IRD Global	IRD Global	
Pakistan	4. Health Information Systems and Monitoring & Learning	4.2 Improve data use-related capacity, tools, evidence generation and/or systems for programme monitoring and learning, especially at the subnational level	Technical assistance for transferring of Sindh Electronic Immunization Registry (SEIR) to Expanded Programme on Immunizations, Government of Sindh for sustained improvement in routine immunization services	Provision of real-time, high quality data for immunization coverage monitoring in the province, with a focus on zero dose coverage and gender equity, improving vaccinators attendance, compliance and data accuracy	IRD Global	IRD Global	
Pakistan	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Provide technical assistance for mobile immunization vans in targeted areas across selected districts in Sindh to improve access, decrease gender inequity, and improve zero dose coverage	Availability of Data-driven comprehensive mobile van implementation plans to immunize children in areas with low immunization coverage, high gender disparity, and clusters of zero-dose and defaulter children.	IRD Global	IRD Global	
Pakistan	4. Health Information Systems and Monitoring & Learning	4.2 Improve data use-related capacity, tools, evidence generation and/or systems for programme monitoring and learning, especially at the subnational level	Technical assistance for ICT and Expanded Programme on Immunization (EPI), Gilgit-Baltistan for ZM-EIR data utilization and evidence-based data driven actions	Provision of real-time, high quality data for immunization coverage monitoring in the province, with a focus on zero dose coverage and gender equity, improving vaccinators attendance, compliance and data accuracy	IRD Global	IRD Global	
Pakistan	2. Human resources for health	2.3 Ensure the immunisation health workforce is regularly supported by performance management systems, including supportive supervision and continuous professional development	Providing Technical Assistance to EPI for developing and rolling-out digital gamified-training modules for vaccinators	Improved learning of vaccinators through availability of digital gamified training modules for vaccinators in ZM-EIR and as a standalone feature	IRD Global	IRD Global	
Pakistan	4. Health Information Systems and Monitoring & Learning	4.2 Improve data use-related capacity, tools, evidence generation and/or systems for programme monitoring and learning, especially at the subnational level	Technical assistance to analyze Big Data from the ZM-EIR (across all provinces where ZM-EIR is implemented), including sub-national geospatial analysis for identifying and tracking zero dose children and decreasing gender inequity	Improved immunization coverage and equity through evidence-based data driven actions, leveraging the big data of ZM-EIR to track real-time coverage and monitor and evaluate interventions designed to close immunity gaps	IRD Global	IRD Global	
Pakistan	4. Health Information Systems and Monitoring & Learning	4.2 Improve data use-related capacity, tools, evidence generation and/or systems for programme monitoring and learning, especially at the subnational level	Technical assistance for expansion of ZM-EIR to Expanded Programme on Immunization (EPI), Government of Khyber Pakhtunkhwa and capacity building of EPI-KPK staff to leverage real-time data for improvement in routine immunization services and evidence-based data driven actions	Provision of real-time, high quality data for immunization coverage monitoring in the province, with a focus on zero dose coverage and gender equity, improving vaccinators attendance, compliance and data accuracy	IRD Global	IRD Global	
Pakistan	5. Vaccine Preventable Disease Surveillance	5.1 Improve the availability and use of timely and accurate data for decisions on vaccine introduction and preventive campaign targeting	Increase surveillance and routine monitoring including capacity building and supporting real time collection of VDPs/AEFI data through mobile app, Community Based Surveillance, and sustaining IBD, Rotavirus, CRS and Typhoid surveillance sites.	On request of district health authorities, will participate in campaigns	PHC Global	PHC Global	\$ 151,349.39
Pakistan	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Enhance the existing EPI Community Outreach strategy and implementation mechanisms	Strengthening community engagement, social profiling and inclusion of relevant community partners for appropriate outreach/stations/establishment	PHC Global	PHC Global	
Pakistan	7. Governance, Policy, Strategic Planning, and Programme Management	7.1 Strengthen capacity of governance/technical bodies for planning, coordination and tracking progress at all levels, particularly for reaching zero-dose children	LMC partner to provide management support to national and subnational programme for strengthening service delivery	Monthly meetings to identify gaps for further actions	PHC Global	PHC Global	
Pakistan	2. Human resources for health	2.1 Improve technical and managerial capacity of healthcare workers to plan, implement and monitor immunisation services	Enhance programme management performance through comprehensive training to vaccinators, mid-level managers and district supervisors	Support and execute trainings for vaccinators, town vaccination supervisors once a year and flexible for need base training	PHC Global	PHC Global	

Pakistan	4. Health Information Systems and Monitoring & Learning	4.1 Ensure timely, fit-for-purpose information is available at all levels of the system, and is used regularly and systematically to improve programmatic reach and performance	Support FDI and provinces in improving day-to-day quality and use of EPI data for monitoring and programming	Dissemination of field level data with UC/town/district on monthly basis	PHC Global	PHC Global	
Pakistan	4. Health Information Systems and Monitoring & Learning	4.3 Strengthen information systems relevant for the identification and reach of zero-dose and under-immunised children	Improve quality of data for monitoring and programming through the roll out of the EPI MIS and Data Quality Assessment and Improvement plan	Improvement of data quality from EPI centers to community	PHC Global	PHC Global	
Pakistan	1. Service Delivery	1.2 Integrate delivery of services to improve efficiency, regularity and/or reliability of planned immunisation activities with a focus on zero-dose and underimmunised children and missed communities	Field level support for restoring and strengthening facility-based immunization to reach un- and under-vaccinated children & rebuild community confidence	Upgradation of micro plans, strengthening community engagement	PHC Global	PHC Global	
Pakistan	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Strengthen capacity of immunisation service providers and support increase in immunisation coverage in low performing areas.	Increase in Card retention, penta3 coverage, FIC and decrease zero-dose	PHC Global	PHC Global	
Pakistan	9. Grant Management and Indirect Costs		Support grants management, coordination with implementing partners to monitor HACT documentation, and procedures; Fund Utilization reports are available timely and followed to ensure 100% utilization Keeps track of open commitments to guide program officers's timely evaluation, closure.	Support grants management, coordination with implementing partners to monitor HACT documentation, and procedures; Fund Utilization reports are available timely and followed to ensure 100% utilization Keeps track of open commitments to guide program officers's timely evaluation, closure.	UNICEF	UNICEF	\$ 1,163,004.73
Pakistan	1. Service Delivery		Provide technical assistance to the planning, development, implementation and monitoring of integrated immunization/health strategies in targetted high risk districts including mega cities to detect and reach zero dose communities and zero dose children to ensure universal immunization coverage through immunization system strengthening, using EPI as an entry point to PHC and through strong coordination with private sector including CSOs.	1. Tailored, gender sensitive strategies to reach Zero dose and missed children in priority districts are implemented including in the mega cities to contribute to universal immunization coverage in urban poor communities hosting most of the zero dose and partially vaccinated children) and remote rural areas (underserved due to access-knowledge, distance, misconceptions, poor health system coverage). 2. Align service delivery led by UNICEF to filling the gaps to universal immunization coverage in urban poor and remote rural, contributing to mitigating the gender gap in planning and coverage. 3. Expand offer of services to meet the needs of marginalized communities, including developing the public private partnership). 4. Roll out a strong program monitoring framework and rapid surveys (LQAs), to confirm data accuracy and efficiency of EPI program implementation. 3. Support provided to the development of Gavi full portfolio/HSS-III planning. 4. Documented progress of the implementation of action plans in targetted districts and mega cities.	UNICEF	UNICEF	
Pakistan	3. Supply Chain		Support the functionality and strengthening of the Federal and Provincial immunization supply chain systems at all levels, support capacity building for RI, COVID response and SIAS, strengthen Vaccine management and support P3 for implementation of EVM IP, develop CCEOP application, establish a cold chain maintenance structure in all provinces, integrate RTMDs into the VLMS to ensure realtime monitoring of CCE performance.	Progress reports are available to inform immunization programmin	UNICEF	UNICEF	
Pakistan	6. Demand Generation and Community Engagement		Work in close coordination with EPI-PEI program and expanded partners for integrated services around demand generation in high risk, hard to reach and targetted mega cities including urban slums for both RI and SIAs. Develop EPI SBCC policy, plan for intensive communication for RI in high risk communities, building on community active participation from planning to implementation, strengthen its leadership and engagement. Support communication and crisis com for COVID 19 vaccine roll out	Support development of Pakistan SBCC strategy 2023/27, development Demand Generation Roadmap developed on integrated immunization-PHC services, new vaccine introduction, COVID 19.	UNICEF	UNICEF	
Pakistan	3. Supply Chain		Support the functionality and strengthening of the Federal and Provincial immunization supply chain systems at all levels, implement EVM IP, develop CCEOP application, establish a cold chain maintenance structure in all provinces, integrate RTMDs into the VLMS to ensure remote/realtime monitoring of CCE performance. Focal person for COVID 19 operational roll out in UNICEF, coordination within UNICEF management, supply/procurement, communication and CC teams.	(1) Developed plans and framework for year 3 Operational Deployment Plan (ODP) for Cold Chain Equipment (CCE) (2) Implement EVM IP and plan for the next EVM assessment in 1 year and Costed Improvement Plan (ciP).	UNICEF	UNICEF	
Pakistan	1. Service Delivery		Provide technical assistance to national, provincial, district, area and facility level in equity focused planning/ microplanning, implementation of plans and monitoring at all levels in respective provinces, support planning and implementation of integrated EPI activities in RI and SIAs, as well as intergation with COVID 19 in relevant age groups.	Supervise TA allocated to EPI, ensure quality gender and equity oriented planning and implementation, monitor results, strengthen partnership at the provincial level, document progress on equitable integrated (RI, SIAs, COVID)delivery of immunization services at all levels (Provincial, District, Facility and Community level). Focal point for the implementation and coordination together with TA available, of EPI workplan (service delivery, ACSM, ISCM, partners coordination, grants management).	UNICEF	UNICEF	
Pakistan	1. Service Delivery		Support the planning and operationalisation of integration component of EPI activities in highest risk areas, to serve as an entry point for PHC, birth registration, IEC on Key family care practices, and ANC. Support microplanning of integrated EPI activities, data collection, digitization, M&E, capacity building, advocacy at all level, as well as EI/PEI synergy.	Strategic directions for ISD are aligned within UNICEF, NEOC and FDI as well as donors. Documented progress on strategy and implementation of integrated activities as prioritized in low coverage districts.	UNICEF	UNICEF	

Pakistan	1. Service Delivery		Managerial oversight (funding, results, HR) for optimal fund utilisation, monitoring performance and results. Provide strategic guidance on the different components of the EPI program (service delivery, ISCM, ACSM, Grants management, partnership), to plan with an equity lens and innovate to reach the zero dose children as well as the completion of the immunization schedule. Promote EPI as an entry point to PHC for children suffering multiple deprivations, through innovative service delivery modalities, including developing the partnership with CSOs. Ensure ISCM and ACSM are fit to support the zero dose agenda as agreed by EPI partners in line with IA2030, UNICEF country program 2023/27 and GAVI 5.0 strategy; strengthen coordination, partnership, guide planning with HSS and gender perspective.	1. Document clear areas of convergence in the development of UNICEF EPI program to strengthen EPI within the UHC investment plan and proposed reforms. 2. UNICEF immunization team and program conduct timely and quality bottom up planning for provinces specific HSS3 approaches in UNICEF areas of accountability. 3. Target plans and teams efforts to reaching zero dose and defaulters for RI at primary and upper level of healthcare, involving CSOs in support to provincial governments. 5. Implement cross sectoral synergistic approaches at all level. EPI/polio/nutrition/ANC/health education/child protection, through detection, immediate service delivery or referral of target children and women, through the roll out of referral slips in priority areas, during polio campaigns and as part of the regular program effort to reach missed children. 6. Ensure cross sectoral collaboration within UNICEF and with partners for efficient COVID 19 vaccine roll out. 7. Linking ACSM priorities to the detection of missed children, through improved coordination, Advocacy and partnership 8. Linking ISCM priorities to underserved populations.	UNICEF	UNICEF
Pakistan			Bridge funding for continuation of activities approved by 2022 IRC until completion of FPP		UNICEF	UNICEF
Pakistan	Service Delivery	Service Delivery: Strengthen capacity of immunisation services. Sustainable increase in immunisation coverage, in low performing areas particularly, in the more remote parts of the country. Reaching Every District (RED) and Reaching Every Community (REC) strategies will be implemented in 33 equity focused selected districts to improve equity in immunisation coverage.	Managerial oversight (funding- results- HR) for optimal fund utilisation- monitoring performance and results. Provide strategic guidance on the different components of the EPI program (service delivery- ISCM- ACSM- Grants management- partnership)- to plan with an equity lens and innovate to reach the zero dose children as well as the completion of the immunization schedule. Promote EPI as an entry point to PHC for children suffering multiple deprivations- through innovative service delivery modalities- including developing the partnership with CSOs. Ensure ISCM and ACSM are fit to support the zero dose agenda as agreed by EPI partners in line with IA2030- UNICEF country program 2023/27 and GAVI 5.0 strategy; strengthen coordination- partnership- guide planning with HSS and gender perspective.	At least 80% of planned activities are implemented and progress documented in all areas (ACSM, service delivery, immunization supply chain, advocacy, managerial components)	UNICEF	UNICEF
Pakistan	Service Delivery	Service Delivery: Strengthen capacity of immunisation services. Sustainable increase in immunisation coverage, in low performing areas particularly, in the more remote parts of the country. Reaching Every District (RED) and Reaching Every Community (REC) strategies will be implemented in 33 equity focused selected districts to improve equity in immunisation coverage.	Provide technical assistance for HSS through immunization system strengthening, and PHC for UHC ; determine the focus, strategies and monitor the implementation, to increase vaccine uptake in urban poor populations with the highest level of inequities.	At least 80% of missed children reached with routine immunization services integrated with basic PHC services in the country	UNICEF	UNICEF
Pakistan	Supply Chain	Cold chain and logistics: Improve and sustain uninterrupted supply of vaccines through a functional and strengthened eLMIS. Procurement of cold chain equipment is based on the EVM improvement plan, cMYP and PC-1.	*Develop an immunization supply chain, Management Information System for vaccine and cold chain, conduct cold chain assessments and bottleneck analysis, develop training module, contribute to cold chain assessment for new vaccine introduction and mass immunization campaign. Contribute EVM and improvement plans, develop EPI supply chain road map The staff member is also the focal point for COVID 19 vaccine roll out and monitoring appropriate planning and implementation, through monitoring cold chain and C4D specialists at subnational level Staff member will spend all required time to respond to FEPI and PEPI specific requests, support EPI program management (funding and results) in areas allocated to UNICEF and attend meetings as they are conveyed at national and subnational level (following UNICEF rules and regulations). The relocation of the staff to Gov structure will have to be discussed between UNICEF management and MoH*	Standardized EVM practices operationalized at all levels	UNICEF	UNICEF
Pakistan		Cold chain and logistics: Improve and sustain uninterrupted supply of vaccines through a functional and strengthened eLMIS. Procurement of cold chain equipment is based on the EVM improvement plan, cMYP and PC-1.	Support implementation of the ISCM plan, under the supervision of P3 ISCM lead, in coordination with field offices and provincial EPI structures	Standardized EVM practices operationalized at all levels	UNICEF	UNICEF
Pakistan	Demand	Enhancing demand generation.	Coordinate all ACSM activities at UNICEF CO, manage a team of ACSM specialists (digitl communication and community engagement) Ensure capacity building of government and ACSM staff , ensure training of vaccinatrns in IPC (interpersonal communication). Support HCD workshops at national and decentralised level, including rapid enquiries at community level to shape a national and province specific ACSM plan, aiming at reaching the hard to reach, in the next FPP. Work in close coordination with EPI-PEI program and expanded partners for integrated services around demand generation in high risk, hard to reach and targetted mega cities including urban slums. Support communication and crisis com for COVID 19 vaccine roll out. Coordinate CSO involvement in SBCC for RI, SIAs and COVID 19 roll out, to address barriers to vaccine uptake and improve female access to vaccination.	Community networks activated and connected with service providers to strengthen the referral mechanism for zero dose children and create demand for immunization/integrated services.	UNICEF	UNICEF

Pakistan	Service Delivery	Improving access to quality integrated immunization services in all provinces	Provide technical assistance to provincial, district, area and facility level in equity focused planning/ microplanning, implementation of plans and monitoring at all levels in respective provinces, support planning and implementation of integrated EPI activities in RI and SIAs, as well as intergration with COVID 19 in relevant age groups.	Enrollment and Coverage of zero dose children and reduced gender disparity in immunization coverage	UNICEF	UNICEF	
Pakistan	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Private Sector engagement in 10 Urban districts in four provinces		WHO	WHO	\$ 1,286,927.01
Pakistan	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Refurbishment of selected EPI centers as per agreed scope of work throughout the country		WHO	WHO	
Pakistan	4. Health Information Systems and Monitoring & Learning	4.2 Improve data use-related capacity, tools, evidence generation and/or systems for programme monitoring and learning, especially at the subnational level	DQA conducted and DQ IP developed in atleast 50% of districts		WHO	WHO	
Pakistan	5. Vaccine Preventable Disease Surveillance	5.2 Increase timely detection of and response to vaccine-preventable disease outbreaks	Real time collection of VPDs/AEFI data through mobile app		WHO	WHO
