

Mission

Saving children's lives and protecting people's health by increasing access to immunisation in poor countries

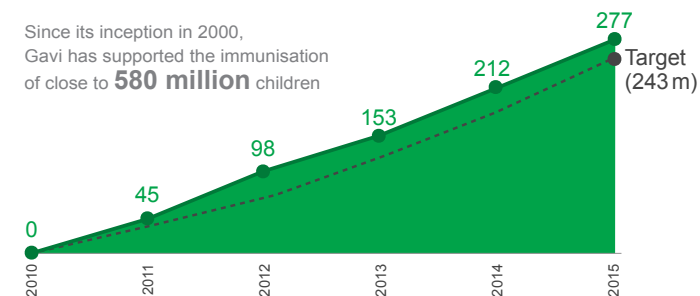

Under-five mortality rate in Gavi-eligible countries (per 1,000 live births)

Number of future deaths averted (millions)

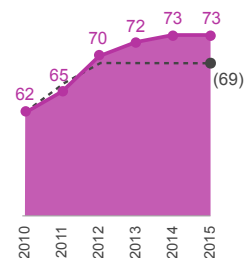

Number of children immunised (millions)

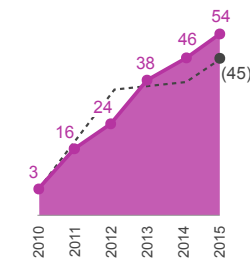

GOAL 1: Accelerate vaccines

Accelerate the uptake and use of underused and new vaccines by strengthening country decision-making and introduction

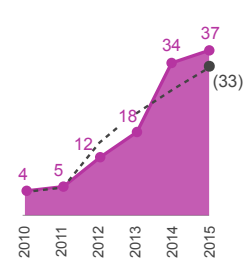

Pentavalent vaccine
Number of countries

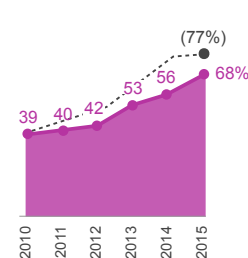

Pneumococcal vaccine
Number of countries

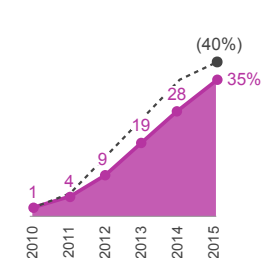

Rotavirus vaccine
Number of countries

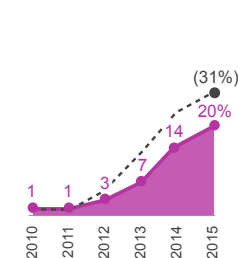

Pentavalent vaccine,
3rd dose coverage (%)

Pneumococcal vaccine,
3rd dose coverage (%)

Rotavirus vaccine,
3rd dose coverage (%)

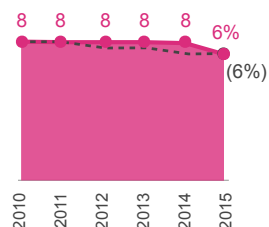

Country introductions of new and underused vaccines

Coverage of new and underused vaccines

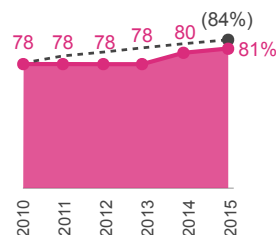

GOAL 2: Strengthen capacity

Contribute to strengthening the capacity of integrated health systems to deliver immunisation

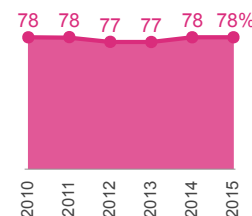

Percentage point difference between DTP1 and DTP3 (% points)

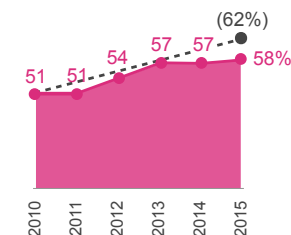

DTP3 coverage (%)

MCV1 coverage (%)

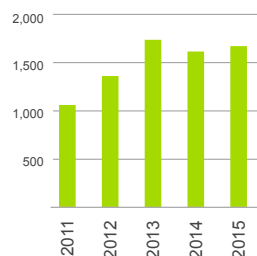

Equity in immunisation coverage (%)
Proportion of countries meeting the minimum equity benchmark

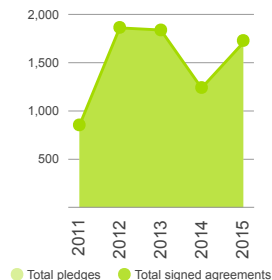

GOAL 3: Increase predictability and sustainability

Increase the predictability of global financing and improve the sustainability of national financing for immunisation.

Total resources available to meet country demand (US\$ millions)

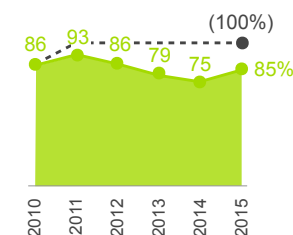

Signed grant agreements vs total pledges, 2011-2015 (US\$ millions)

Country investments in vaccines
Average expenditure per child (US\$)

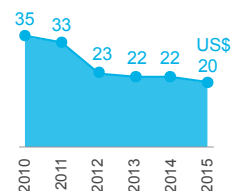

Timely fulfilment of co-financing commitments
Proportion of countries (%)

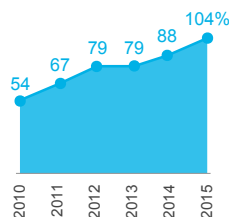

GOAL 4: Shape the market

Shape vaccine markets to ensure adequate supply of appropriate, quality vaccines at low and sustainable prices for developing countries

Total cost to fully immunise a child with pentavalent, pneumococcal and rotavirus vaccines: selected vaccine package price (US\$)

Security of supply (number of products offered as % of 5-year target)
