UPDATE FULL COUNTRY EVALUATIONS (FCE) 1/3

Phase 1 (2013-16) – Bangladesh, Mozambique, Uganda and Zambia:
• 2016 Final Reports and briefs available

Phase 2 (2017-19) – Mozambique, Uganda and Zambia:
• EAC approved the FCE consortium proposal
• Defining areas for collaboration with Global Fund Prospective Country Evaluations (PCE)
Summary of general findings Gavi FCE 2013-2016 (by FCE Consortium)

• Range of new vaccines have been introduced with Gavi support
  o Variable success in introduction and routinization; however, improving over time with evidence of learning
  o Evidence of impact on health outcomes for Pneumococcal Conjugate Vaccine (PCV) and Measles – Rubella (MR)

• HPV demonstration project while providing learning opportunities for delivery have not been optimal for informing national introduction

• HSS has been the most challenging support window with slow progress and delays across the whole grant cycle
“We applaud Gavi’s efforts, as a “learning organization” over the course of the FCE, to learn from FCE findings and adapt accordingly. We report on many positive developments (for example, the HPV 2.0 policy, HSIS and CEF, and the refinement of PEF over time) related to strategic and operational shifts, and a growing culture of measurement in the Secretariat.”
