Decision Letter: Somalia 2019 Request for CCEOP Support from Gavi

Your Excellency,

I refer to the request for support for the Cold Chain Equipment Optimisation Platform (CCEOP) which has been submitted by Somalia to the Gavi Secretariat in May 2017. In June 2017, the Independent Review Committee (IRC) reviewed your support request and recommended approval with clarifications. Based upon the clarifications presented, the IRC recommends approval of the CCEOP support for country, as described in Annex A to this letter. The first year of CCEOP was communicated by Decision Letter dated 31 January 2018.

Gavi appreciates the country’s request and is fully committed to support the proposal recommended by the IRC, as reflected by the Gavi Board allocating funding to the CCEOP programmes at its meeting in December 2016.

The allocations beyond year 2019 are expected to be communicated during 2019, taking into account resource availability and updated CCEOP-related policies and procedures. However, in order to facilitate timely implementation of the CCEOP Programme, year 2019 is approved.

The Annex includes the following important information:

Annex B: Gavi Terms and Conditions

### 15. Other conditions
The country is reminded of its obligations under the PFA with respect to insurance and is requested to provide information to Gavi on the steps it has taken in this regard.

---

1 **Indicator definition**: % CCE functioning = (# functioning CCE devices) / (total # of CCE devices designated for use). CCE devices considered for this indicator include all refrigerators, fixed passive storage devices, walk-in cold rooms and freezers designated for storing vaccines. Both the numerator and denominator should be collected from the same geographical area / period in time and should not include decommissioned equipment. Functionality of CCE is broadly defined to mean that the device is operable at a particular point in time for storing vaccines.
The disbursement of Gavi annual amounts is subject to UNICEF’s confirmation of receipt of the country’s joint investment share.

The country is also reminded that it is responsible for reception at the port of entry, customs clearance and for provision of a waiver of (or, in the absence of waiver, paying for) any taxes or other duties for each consignment of Cold Chain Equipment. Government must provide UNICEF in advance with confirmation of such waivers or payments of taxes and duties, as well as country specific requirements for importation. Country is advised to pay special attention to proposed delivery modes and schedules agreed with the supplier and it’s local agent when initiating the deployment and commissioning of goods. Alternative forms of installation such as mounting of solar panels on a pole rather than on the roof of the health facility should be identified during the preparation of deployment plans that are shared with UNICEF for costing. Other conditions such as seasonality could also affect the efficiency of the outsourced deployments. If the country has to make unplanned variations to the delivery schedules, such as where conditions for installation and implementation are delayed or in cases of force majeure, the government must develop a deviation protocol to document such cases and any cost implications of such variations. The Government will be responsible for all such costs.

On behalf of Gavi
