| Somalia   | Supply chain and vaccine wastage         | • Support finalization/ development of costed comprehensive Improvement Plan (cIP) and follow-ups in its implementation.  
• Provide support in the development of Cold Chain Equipment Optimization Platform Application (CCEOPA)  
• Provide support to EPI to improve cold chain and vaccine management including:  
---- Support country in rolling out Fridge Tag2 (Temperature monitoring devices) through workshops & supportive supervision  
---- Conduct trainings for MoH and Partner’s technical staff (focusing on implementation of the EVM cIP)  
---- Support the electronic and manual vaccine stock management tool (SMT) roll out and the use of Key Stock Management Indicators for action  
---- Update cold chain equipment inventory quarterly | UNICEF    | Stock and Cold Chain Equipment Management related indicators improved      |
| Somalia   | Supply chain and vaccine wastage         | Support the Implementation of the cold chain maintenance plan including trainings of Cold chain technicians.  
Support to new Health facilities established (new liberated areas) through cold chain equipements (transportation and installation) | UNICEF    | Improved skill leading to effective responses to CC and maintenance requirement |
| Somalia   | Demand generation                        | • Social Mobilization micro planning for immunization for each zone (RSMC, DSMC) for focused 37 districts.  
• Training of health care providers on social mobilization and IPC in focused districts, in SCZ & Puntland.  
• Advocacy with MOH & Partners | UNICEF    | Health care providers are able to deliver five key messages on routine immunization to caregivers at vaccination site.  
Dropout and missed families numbers reduced. |

| Somalia   | Health System Strengthening               | - RI strategy to be tailored to address the outcome of the equity assessment which will be conducted in Q1 2017 (The equity assessment shall clarify populations that are disadvantaged due to geographic or socio-economic consideration (particular caste or ethnicity; members of a particular religious group; mobile and/or displaced populations; members of a particular gender; members of a particular wealth quintile; or members whose caretakers have a certain level of education);  
- Orientation session on Introduction of RI Strategy developed on the basis of equity assessment in all zones of Somalia.  
- Translate the RI strategy into appropriate micro plans;  
- Support training in micro-planning for routine immunization, in particular on logistics and communication for underserved groups (nomads, IDPs) in complementarity with demand generation activities. | UNICEF   | Improvements in immunization coverage are inclusive of the children in the most marginalized, remote and poorest communities and overall inequities within the immunization program are reduced                                                                                                                                                             |
